1. The following is an examiner's statement of reasons for allowance: Wolfinbarger, Jr. et al. (US Patent 5,977,432) discloses the known use of a centrifuge for inactivating pathogens in a tissue such as bone. Wolfinbarger, Jr. et al. does not disclose flowing the inactivating solution continuously to and from the centrifuge. Wolfinbarger, Jr. (US Patent 5,976,104) teaches continuously flowing an inactivating solution to and from a treatment chamber but *only* when a solvent line is attached directly to the tissue. Wolfinbarger, Jr. does not teach a centrifuge. The combination of Wolfinbarger, Jr. et al. with Wolfinbarger, Jr. would teach attachment of the solvent lines directly to the tissue within the centrifuge chamber. Clearly, such a modification would destroy the apparatus of Wolfinbarger, Jr. et al. since the centrifuge would be incapable of operating with a solvent line attached directly to the tissue placed therein. Thus, the prior art does not teach or suggest the claimed method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
